## FEBRUARY 2023 REBUILDING UPDATE

Lenten greetings from the Rebuilding Committee. This month, the Committee has been working to compile and present to FEMA documentation showing how it would have cost significantly more to try to salvage the church building. This is another important step in the process as we work toward congressional approval. In addition, the Committee opted to install permeable pavers in a portion of the parking lot to address storm water runoff. These pavers are necessary to obtain approval of our project by the Codes Department.

As always, please send any thoughts or questions to [eastendrebuilding@gmail.com](mailto:eastendrebuilding@gmail.com).
