September 2023 REBUILDING UPDATE

Rebuilding Committee September Update

In September, the Rebuilding Committee held two town halls to update East End on our next steps with FEMA and answer questions. Please consider watching the [video](#) if you weren't able to attend.

At the town halls, we discussed the set of plans our architects are creating to show that FEMA has underestimated the costs of replacing the building. These plans are almost finished, and during a recent meeting with FEMA, they told us that we were on the right track with our planned next steps. We remain hopeful about increasing FEMA's contribution and will share further news as we have it.
